Online Backups & Disaster Recovery

SECURED IN OUR OFFSITE LOCATION

85under offers many solutions to ensure that your important data is preserved in the worst case scenarios, whether it's a natural disaster or an internal network failure. Regardless of whatever destructive force your systems might face, we can safely store your information where it's practically disaster-proof — 85 Feet Underground.

Benefits

- Physical Safe Haven
- Virtual Accessibility
- Synchronization
- Value
- Location
- Online Backups
- Server Replication
- Disaster Recovery as a Service

Physical Safe Haven

Data is stored in a secured, off-site, underground facility.

Virtual Accessibility

Clients can easy access their backed-up data in case of disaster.

Synchronization

Our data backup and sync capabilities are comprehensive and seamless.

Value

We offer quality protections with the cost efficiency of cloud-based storage.

Location

Geographically separated data centers to protect from natural disasters.

Online Backups

Availability at all times online. Monitored remote storage.

Server Replication

Exact copies of your critical production environment. Options available to have live temp server environments during your outage.

Disaster Recovery as a Service

Limited upfront costs to have all of your information protected.

About Us

What makes us Unique	
Underground	- Our datacenter is 85 feet underground
Bandwidth	- Gigabit Speed Burstable
Selection	- Custom Server Components - Select Cores, RAM and Storage individually. Buy only what you need
Simplicity	- Microsoft Licensing Month to Month On Demand
Accommodating	- Host your own hardware (or lease dedicated) on the same network as your cloud server (colocation)
Managed	- pulse85 offers a persistent team assigned and dedicated to you (get to know them by name!)

Enterprise Hardware

Technical Specifications	
Cisco Server Hardware	Cisco Firewall and Intrusion Prevention
IBM Enterprise-class SAN infrastructure	Create Server Template Images
Cisco Datacenter Switching Infrastructure	Microsoft and Linux Operating Systems
Data Center Power - Failover N+1	Add SQL Server 2008 R2 or 2012 DB
Multi Homed Fiber Internet - Burstable to Gbit	Managed Server option with Pulse85
