Online and Offsite Data Backups

ALWAYS HAVE A PLAN B

Many have discovered the hard way that implementing a reliable offsite backup program is critical for the health and stability of their business. Failing to have a consistent backup plan is like paying your insurance premium only on occasion: there's no assurance that the support will be there when you need it the most. Don't let disaster strike while you're unprotected. Let 85under help you implement a reliable data restoration plan today.

Benefits

- Peace of Mind
- Variety
- Resources

- Managed
- Security
- Customizable

- Only What You Need

Peace of Mind

Your important data is preserved in a practically disaster-proof refuge, 85 feet underground.

Variety

We have several different backup options to fit your needs and budget.

Resources

The 85under network operation center continuously monitors backup status to ensure that your data is always safe, sound, and secure.

Managed

Our team watches your backups 24/7 we'll resolve any issues that may arise and ensure your data is ready to restore in the event of a disaster.

Security

85under's backup software provides end-to-end encryption and at rest encryption to ensure your data is always safe and secure.

Customizable

Create the exact package of critical tools to ensure your data is secured in layers of safety.

Only What You Need

Pay for only what you need, when you need it. Commitment free monthly billing.

About Us

What makes us Unique
Underground - Our datacenter is 85 feet underground
Bandwidth - Gigabit Speed Burstable
Selection - Custom Server Components - Select Cores, RAM and Storage individually. Buy only what you need
Simplicity - Microsoft Licensing Month to Month On Demand
Accommodating - Host your own hardware (or lease dedicated) on the same network as your cloud server (colocation)
Managed - pulse85 offers a persistent team assigned and dedicated to you (get to know them by name!)

Enterprise Hardware

Technical Specifications
