Enhance the Protection

OF YOUR SYSTEM AND NETWORK FROM SPAM

Spammers constantly bombard business email accounts with junk messages. This not only distracts your employees, but it can also expose your systems to malware and phishing attacks. Your organization's productivity increases dramatically when unsolicited and unwanted email never reaches the inbox.

Passing your email traffic through cloud based security systems creates the critical protection needed.

Benefits

- Effectiveness
- Productivity
- Affordability
- Virus & SPAM Filter
- Prevent Spoofing & Phishing
- Reputation Analysis
- Fingerprint Analysis
- User Interface & reporting
- Works with On-Premise and Hosted Email Systems

Effectiveness

Multi-layered spam filtering process that eliminates 97% of spam.

Productivity

With only legitimate emails coming through, your employees are better able to stay on task.

Affordability

We offer spam filtering at no additional cost with all hosted exchange accounts.

Virus & SPAM Filter

We profile the current threats and ensure that infected messages are redirected away from your inbox.

Prevent Spoofing & Phishing

Reputation and fingerprint analysis provide a safer world for your users.

Email Encryption

Secure your email by encrypting it during transport and at rest, providing secure retrieval by your recipients through HTTPS web access.

Reputation Analysis

We monitor and block servers on the internet that regularly send spam and infected emails. Reputation matters.

Fingerprint Analysis

A complex database of captured emails help to create a system of recognizing and rejecting the product of the bad guys.

User Interface & Reporting

Users in your organization receive regular reports about the threats from which they have been protected. They can login and adjust their settings or deliver any messages that were wrongly quarantined.

Works with On-Premise and Hosted Email Systems

Whether you manage your own mail server or use a hosted service like office 365, 85unders email security service will work for your organization.

About Us

What makes us Unique	
Underground	- Our datacenter is 85 feet underground
Bandwidth	- Gigabit Speed Burstable
Selection	- Custom Server Components - Select Cores, RAM and Storage individually. Buy only what you need
Simplicity	- Microsoft Licensing Month to Month On Demand
Accommodating	- Host your own hardware (or lease dedicated) on the same network as your cloud server (colocation)
Managed	- pulse85 offers a persistent team assigned and dedicated to you (get to know them by name!)

Enterprise Hardware

Technical Specifications
